

UFO Mushroom Lens

Small round lens, similar to the UFO Star Lens but with a hole all the way through for star effects.

Has a dome shaped profile. Supplied with an back washer which can be optionally fitted.

Description	
Material	Polycarbonate
Colours available	Clear
Size	6.5 mm
Weight	0.1 g
Mounting hole size	3 mm
Fibre size	0.75 mm, 1 mm, 1.5 mm polymer

Makes it easier to drill the holes required for small fibres from 0.75mm to 1mm, while giving a sharper look to the light than the UFO Star Lens.

This fitting does not allow as a good a seal as the Star Lens when used in damp areas..

The optional clear washer effectively expands the diameter of the lens where uneven holes have been drilled
