

## UFO Star Lens

Small conical fittings made from polycarbonate for star effects. Supplied with back washer which can be optionally fitted.

Description	
Material	Polycarbonate
Colours available	Clear
Size	5.5 mm
Weight	0.1 g
Mounting hole size	3 mm
Fibre size	0.75 mm, 1 mm, 1.5 mm polymer

Makes it easier to drill the holes required for small fibres from 0.75mm to 1mm, while giving a slightly softer look to the light.

Can help hide uneven holes and makes it easier to seal around when used in a humid area.

The optional clear washer effectively expands the diameter of the lens where uneven holes have been drilled.
